

Virtual Chief Information Security Officer (vCISO)

A Flexible, Tailored Approach

Our vCISO and vSO offerings deliver customized solutions and recommendations designed to address your specific needs, concerns, and strategic goals.

Information Security Program Management

We partner with you to design and maintain a security program that aligns with your business strategy and risk tolerance, ensuring structure, clarity, and durability across your security lifecycle.

Trusted Security Advisors

Connection provides executive-level guidance to help leaders reach decisions that drive reasonable security measures. We bring clarity and focus to today's rapidly shifting threat landscape.

Governance and Compliance Oversight

We ensure your security program supports your regulatory, audit, and compliance requirements.

Strengthen your organization's security posture and operational resilience through our Virtual Chief Information Security Officer (vCISO) service.

As organizations navigate today's dynamic cybersecurity landscape, adopting a vCISO model has become a vital, cost-effective approach to accessing seasoned security leadership. Our exceptional network of vCISOs provides the executive-level leadership and strategic expertise necessary to safeguard your environment and guide your cybersecurity maturity.

A Customized, Executive-level Security Program

vCISO

Our vCISO service delivers an Executive-level security leader who collaborates with your organization to build, enhance, and oversee a tailored information security program aligned to your risk tolerance, regulatory obligations, and long-term business strategy.

vSO

For organizations requiring additional operational support, our vSO (Virtual Security Office) offers access to a broader team of security specialists as needed, all led by the vCISO. This team helps ensure that your company's systems, data, and people are well protected by scaling up security resources when necessary.

Taking the Lead in Cybersecurity Leadership

By leveraging ISC2 Certified Information Systems Security Professional (CISSP) domains and the Center for Internet Security (CIS) framework, Connection ensures a structured, effective, and scalable approach to managing cybersecurity across your organization by utilizing a five-pillar approach:

- **Security Maturity Assessment and Gap Analysis:** We identify vulnerabilities and define clear, prioritized actions.
- **Risk and Incident Readiness:** Connection strengthens resilience with structured risk management and tailored incident response planning.
- **Policies and Procedures:** Our experts build scalable, framework-aligned policies to support consistent security operations.
- **Program Development and Oversight:** We design and manage a comprehensive cybersecurity program that evolves with your business.
- **Custom Cybersecurity Strategy and Roadmap:** We deliver a tailored roadmap connecting security initiatives to your goals, compliance needs, and long-term growth.
