

Eonis 3D

Discover the world's first glasses-free, medical 3D display

- **Autostereoscopic 3D with advanced eye-tracking & lenticular lens projection**
- **4K resolution on standard-size 27" screen**
- **Effortless switching between 2D & 3D for any task**
- **DICOM-compatible, Class 1 medical-grade display**
- **Remote QA management tools**

Revolutionize medical visualization across patient consultations, surgical planning, and medical education with Eonis 3D, our pioneering 3D monitor solution. This groundbreaking technology delivers uncompromised **glasses-free 3D imaging**, providing you with unprecedented depth perception and easy spatial understanding.

See beyond dimensions. Discover depth without limits

Eonis 3D is the **first glasses-free medical 3D monitor solution** that transforms complex anatomical data into intuitive, depth-rich experiences—supporting better patient understanding, improved surgical preparation and easier education across any healthcare environment.

World's first glasses-free, medical 3D display

Revolutionary autostereoscopic technology delivers true depth perception without eyewear

Remote QA management tools

Seamlessly integrates with FLOS & QAWeb Enterprise for optimized medical workflows

All-in-one versatility for any workflow

Effortlessly interact with email, patient records, standard 2D images, and advanced 3D visuals—all on a single screen

Medical-grade reliability & longevity

Class 1 medical device with 3-year warranty and maintenance-free FLOS stabilization

Future-proof investment

DICOM-compatible with OpenXR support for seamless integration and future compatibility

Eonis 3D **integrates seamlessly** with existing PACS and imaging platforms while its ergonomic design supports eye comfort during extended viewing sessions. **Advanced calibration** through its front sensor and integration with QAWeb Enterprise software maintains consistent image quality across the entire display, during its entire lifespan.

Eonis 3D comes in a **comfortable, standard 27" size** – perfect for any desk. And without the need for special eyewear, Eonis 3D renders complex anatomical structures with exceptional clarity and true depth, allowing for **intuitive interpretation of pathologies**.
