STRATEGIC SECURITY EVALUATION

To effectively govern risks, you must fully understand and document your current security posture. Our Strategic Security Evaluation offers a comprehensive overview of your security technology across endpoints, networks, data, cloud, and compliance.

The executive overview of your security landscape with severity grading allows you to focus your critical resources directly on the areas where attention is most required.

Why a Strategic Security Evaluation?

Visibility across your total security landscape

Endpoint Security

Zero-trust Posture

Firewalls and Content Filtering Compliance

Security Awareness Training

Understand effectiveness of your security architecture

Documented risk scoring with a high-level remediation roadmap for executive level discussions

Evolve your security posture

Access to Connection's suite of services to evaluate, assess, remediate, implement, and manage

Our Approach to the Strategic Security Evaluation

Our cybersecurity consultants conduct interviews to identify and document risks without using technical tools or agents. This includes assessing your current security technology, processes, policies, and tools. Post-interview, you'll receive a report with a prioritized risk summary and a segmented risk roadmap for success.

DELIVERABLES:

- **Documented risk scoring** in a single view that provides a risk ranking for each security domain, as well as an aggregated score for the entire ecosystem
- **Actionable reporting** with a **prioritized risk summary** organized by criticality, detailing the highest risks across endpoint, network, compliance, data, cloud, and operational security domains
- **Vendor agnostic** recommendations tailored to your organizational needs, perfect for C-level discussions detailing how to achieve organizational security objectives

Connection security engineers can further assist with security policy review, compliance needs, technology evaluation, and threat intelligence information specific to your environment.

Why Connection?

Connection offers products, technical expertise, services, and solutions to help your business adapt to the ever-changing technology landscape. We drive innovation through delivery and deployment, and by leveraging our knowledge, we can help to ensure you optimize your investments and improve ROI by reducing risks and costs.
