Dell Trusted Workspace

Secure anywhere-work

with hardware & software defenses built for today's cloud-based world.

Hybrid work exposed organizations to new attack vectors. With adversaries using increasingly sophisticated techniques, effective endpoint security today requires multiple layers of defense that protect the device, network and cloud.

Reduce the attack surface and stay ahead of modern threats with a comprehensive portfolio of hardware and software protections.

Multiple layers of defense

Built-on **Software Security**

Layer on advanced threat protection with software from an expertly selected partner ecosystem. Take advantage of the benefits and efficiencies that come from consolidating security purchases.

Built-in **Hardware & Firmware Security**

Prevent and detect foundational attacks with the world's most secure commercial AI PCs.¹ Deep defenses at the BIOS/firmware and hardware levels keep the device protected in-use.

Only Dell integrates PC telemetry with industry-leading software to improve fleet-wide security.¹

Built-with **Supply Chain Security**

Work confidently knowing your device is secure from first boot. Secure PC design, development and testing help reduce the risk of product vulnerabilities. Rigorous supply chain controls reduce the risk of product tampering.

Prevent, detect and respond to threats wherever they occur

Dell Trusted Workspace Built-with & Built-in Security

World's most secure commercial AI PCs¹

Be secure from first boot

Rigorous, state-of-the-art supply chain controls and optional add-ons, like Dell-unique **Secured Component Verification**, provide assurance of PC integrity.

Verify firmware integrity

Dell-exclusive **firmware verification** (hardware-based security found in Intel processors) protects against unauthorized access to and tampering of highly privileged firmware.

Secure end user credentials

Verify user access with Dell-unique **SafelD**, a dedicated security chip that keeps user credentials hidden from malware.

Maintain BIOS integrity

Catch and repel threats with Dell-unique BIOS verification **SafeBIOS**. Assess a corrupt BIOS, repair it and gain insights that reduce exposure to future threats.

Spot ticking timebombs

Indicators of Attack, an early-alert feature offered only by Dell, scans for behavior-based threats before they can do damage.

Catch known vulnerabilities

Dell-unique **Common Vulnerabilities and Exposures (CVE) Detection** monitors for publicly reported BIOS security flaws and recommends updates to mitigate risk.

*Industry Leadership Validated by Principled Technologies**

Shrink the IT-security gap with PC telemetry

Enrich software solutions with below-the-OS insights. Only Dell integrates PC telemetry with industry-leading software providers to improve fleet-wide security.¹

Dell Trusted Workspace Built-on security

Software to improve the security of any fleet

Thwart advanced cyberattacks with **Dell SafeGuard and Response**

Prevent, detect and respond to threats wherever they occur. Artificial intelligence and machine learning proactively detect and block endpoint attacks, while security experts help hunt for and remediate identified threats across the endpoint, network and cloud.

Explore Dell Security Services

With Dell, customers can self-manage security or have specialists manage it for them. Engage our fully-managed, 360° SecOps solution designed to prevent, respond and recover from security threats in the IT environment.

Integrated security

Evolving cyber threats circumvent software-only defenses. Help shrink the attack surface of endpoints with **hardware-assisted protections**.

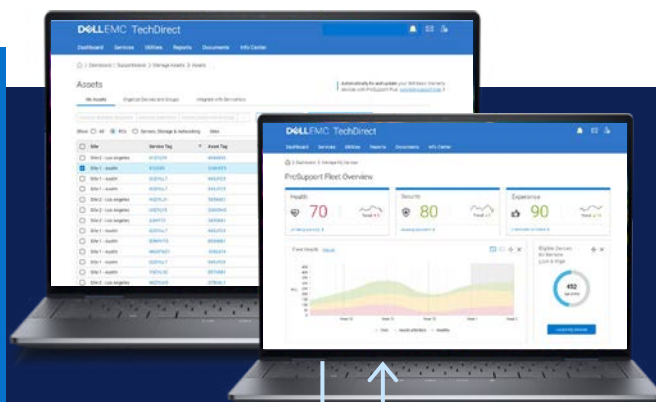

To protect against modern threats, hardware and software defenses must work together. That's where Dell can help. We work with industry-leading security partners, combining rich, device-level telemetry with cutting-edge threat detection to improve the security of your fleet.

- ✓ Reduce the attack surface
- ✓ Improve threat detection

- ✓ Maintain device trust
- ✓ Consolidate providers
