

Windows 365 Link

Secure productivity in shared spaces
with a simple-to-manage device

Modernize work with streamlined Cloud PC devices

To enable more secure, resilient, and scalable experiences, organizations are continuously committing more resources to the cloud. However, they must balance delivering reliable and smooth virtual desktop experiences with secure access and simplified IT management.

The simple, secure, purpose-built device for Windows 365

Windows 365 Link is the first Cloud PC device that's purpose-built by Microsoft to connect directly to Windows 365. This device provides a more secure and cost-effective alternative to traditional desktops in shared spaces. With Windows 365 Link, users can work in a familiar Windows desktop in the Microsoft Cloud with responsive, high-fidelity experiences.

Why Windows 365 Link?

Cloud-powered performance

Maximize productivity with devices that connect users directly to Windows 365 Cloud PCs in seconds.

Secure by design

Reduce attack surfaces with no local data, no local admin users, and passwordless authentication.

Simplified IT management

Configure devices in minutes and manage alongside other PCs with Microsoft Intune.

Aligned with sustainability goals

Advance sustainability with energy-efficient devices that are designed to be long-lasting.

Familiar user experiences in shared spaces

Windows 365 Link is ideal for desk-based or frontline workers with Windows 365. Use cases include:

Hot desking

Enable hybrid workers to pick up where they left off.

Contact centers

Provide frontline workers with secure access to tools and information.

Specialized spaces

Empower people working in retail, labs, training centers, reception desks, etc.

Windows 365 Link projected benefits

According to a Microsoft-commissioned Forrester TEI study, Windows 365 Link is projected to deliver a substantial ROI of up to 195% over six years for a composite organization.¹

22%-30%

time saved due to responsive user experiences and fewer hardware issues¹

50%-90%

IT time saved on desktop provisioning and decommissioning¹

Up to 1 week

faster time for new desk-based workers to be productive¹

1. New Technology: The Projected Total Economic Impact™ Of Windows 365 Link, a commissioned study conducted by Forrester Consulting on behalf of Microsoft, July 2025. Results project the financial benefits for a composite organization with 2,000 employees, 500 contractors, and \$4 billion in annual revenue. The study findings are informed by interviews with six IT decision-makers who had experience using Windows 365 Link and survey responses from 212 IT decision-makers and end-user managers who had experience with or interest in using Windows 365 Link. Projections reflect perceived benefits reported by participants and are not guaranteed.

It's security, cost efficiency, and sustainability benefits in one little black box. The costs are already lower than a laptop or desktop and, with the extended life cycle time, it's far less expensive even if you factor in the cost of the Windows 365 licenses.¹
