

# OFFICE AS A SERVICE

## Certifications and Compliance Programs

Office as a Service is a full turnkey solution for small- and medium-sized businesses. It is a cost-effective way to manage and deploy secure, cloud-based work environments that meet the demands of modern users. It is a tailored desktop solution that delivers the technology, support, management, and expertise needed to fully embrace hybrid work on a private or public cloud platform. It fully integrates with unified communications, collaboration, and contact center solutions to enhance productivity and deliver a seamless user experience.

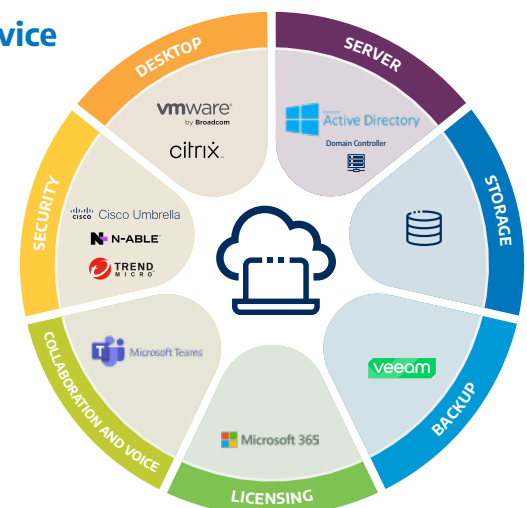

## Bundle with Hardware

Managed Office as a Service is the next generation approach to end-user computing, delivering a central and secure on-ramp to Software as a service (SaaS) and applications from nearly any device (mobile, tablet, or PC), in the office, at home, or on the road.

It can be utilized in the form of a fixed monthly OPEX cost that covers both hardware and managed desktop services, versus a CAPEX cost for a physical device and continuous IT support.

## Business Benefits of Office as a Service

- **Simplify IT:** Free up time and resources with a full turnkey IT solution that provides predictable costs.
- **Enhance Security:** Set tighter security controls and easier enforcement of compliance standards.
- **Increase Business Agility:** Meet the expectations of the modern workforce and gain agility and responsiveness.
- **Productivity:** Increase productivity with the ability to access all your applications from a single location from any device.
