

MICROSOFT THREAT PROTECTION WORKSHOP FROM CONNECTION

Learn How to Put Next-generation Microsoft Security Tools to Work for You

Today's businesses face increasing data and alerts, budget constraints, and outdated systems. Schedule a Threat Protection Workshop to identify threats and achieve security objectives.

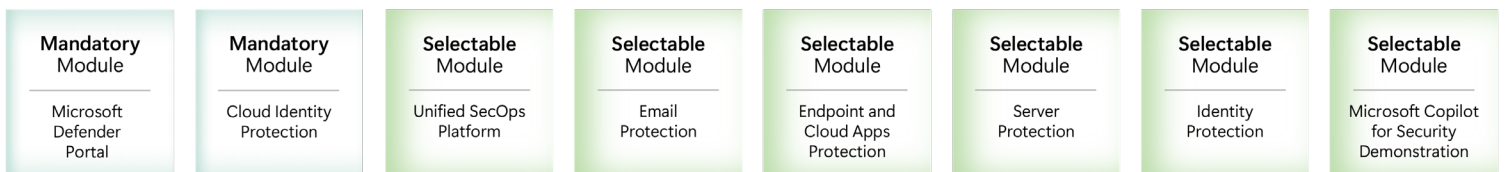

Our team will work with you to develop a strategic plan tailored to your organization, leveraging Microsoft's security expertise. Gain actionable insights into threat exposures across client and server endpoints, email, and identity, along with tailored recommendations to remediate vulnerabilities and strengthen your long-term security posture.

What to Expect:

Gain clarity and control over your organization's cybersecurity strategy with actionable insights to protect against threats. This modular workshop focuses on:

- Identifying and analyzing specific cybersecurity threats targeting your organization
- Providing immediate recommendations to mitigate vulnerabilities
- Highlighting security risks across your entire Microsoft stack
- Offering expert guidance and tactical recommendations for long-term security improvements

At least three selectable modules must be included in the engagement.

Why Connection?

As a leading Microsoft Partner, Connection provides a range of products, services, and solutions—along with technical expertise—to help your business navigate the constantly evolving technology landscape. We fuel innovation by focusing on effective delivery and deployment, and our deep knowledge—including many technology solution designations and advanced specializations—ensures that you maximize the return on your Microsoft investments.
