

Adobe

Supercharge creative teams with Adobe Creative Cloud for enterprise.

Upgrade to Creative Cloud for enterprise—a unified creative system designed to unlock greater speed, security, and control for your organization.

Key benefits for IT leaders:

-  **Save time**
Rapid deployment means your teams get the latest creative tools instantly—no delays, no bottlenecks.
-  **Protect your business**
Security features like Single sign-on (SSO) and Federated IDs safeguard sensitive data and IP.
-  **Streamline management**
Powerful admin console lets you provision software, manage AI usage, and track licenses efficiently.
-  **Peace of mind**
24/7 dedicated technical support and seamless onboarding for your organization.

What's at risk without an enterprise plan:

-  When users access multiple creative tools with weak credentials, sensitive customer data and IP are exposed to threats.
-  **Single sign-on (SSO)** centralizes authentication and enforces strong security for everyone.

-  Sharing internal credentials to collaborate with external creative partners can lead to security breaches and loss of control over sensitive assets.
-  **Federated ID** enables secure, auditable access for collaborators, ensuring creative teams work safely without compromising internal systems.

-  Broad access to AI or other services isn't always appropriate for every role, and limiting usage can be challenging without the right controls.
-  **Custom user groups** let admins manage apps and AI services by role, while also using controls to define which AI models are available to those users.

-  As creative teams grow across business units, bottlenecks can occur when only a few people control admin functions.
-  **Centralized admin roles** delegate operations and let the right people manage certain tasks.

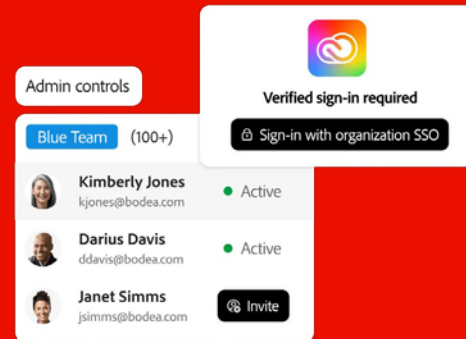

-  Employees who leave but retain access to company credentials can pose a serious security threat.
-  **Automatic user deprovisioning** ensures access is revoked immediately, closing critical gaps.
