

Modernize healthcare delivery with ChromeOS

Get fast access to patient information and provide modern care in the moment with secure experiences for clinicians, patients, and healthcare organizations.

ChromeOS delivers modern clinician experiences

No matter your end user or use case, ChromeOS offers unmatched security, ease of use, and manageability.

Mobile healthcare

Free your practitioners from fixed workstations with mobile access to the information they need, even when their device is offline, as apps persist even when not connected to Wi-Fi.

Shared workstations

Provide read access to electronic healthcare systems (EHRs) via Citrix and VMware VDI. Simplify sign on and sign off to shared devices with identity management solutions like Imprivata.

Virtual care and telehealth

Support and connect with your patients remotely, monitor health digitally, and set up virtual visits.

Digital training and communication

Empower caregivers to access training and resources with shared and temporary ChromeOS devices.

Unlock the power of ChromeOS device management in three easy steps

01

Configure policies, deploy apps, and update content remotely.

02

Enroll devices to sync policies, apps, and content automatically.

03

Remotely manage and monitor your devices.
