

COPILOT+ PC WORKSHOPS

Discover What's Possible with the New Category of Windows Devices

Modern work demands speed, intelligence, and security. Copilot+ PCs deliver all three—and the Copilot+ PC Workshops help your organization understand exactly how.

Workshop Level 100: Copilot+ PC, Discover the Full Value

Explore the new category of Windows devices—designed not just for AI, but for real business outcomes.

This session highlights how Copilot+ PCs combine modern performance, AI acceleration, manageability, battery efficiency, and platform extensibility to support both local and hybrid AI readiness.

WHAT YOU'LL LEARN:

- » How Copilot+ PCs deliver more than AI features like Click to Do, Live Captions, and Cocreator
- » How enhanced performance and battery efficiency support today's mobile, AI-driven workflows
- » How simplified manageability helps reduce IT overhead
- » Independent research and customer examples showing measurable business value

Workshop Level 200: Copilot+ PC, Security Deep Dive

This session focuses on the advanced security foundation built into Copilot+ PCs, designed to protect users, data, and devices at the hardware level.

WHAT YOU'LL LEARN:

- » How Microsoft Pluton and Secured-core PC technology strengthen device protection
- » How hardware-based security and local AI processing help simplify compliance
- » What's new in Windows Resiliency to help prevent, manage, and recover from security incidents

Contact your Connection Account Team to sign up for these workshops and to learn more about the power of Copilot+ PCs.
