DIGITAL WORKSPACE SOLUTIONS
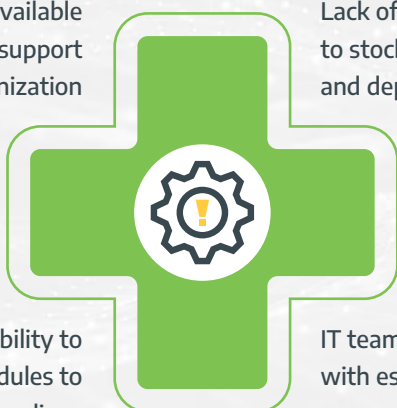

Healthcare-in-a-Box: IT Deployments Made Easy

We Understand Today's Healthcare IT Deployment Challenges

Lack of resources available to effectively support clinical modernization

Lack of skillsets or capabilities to stock, configure, validate, and deploy IT

Lack of scale and ability to compress project schedules to meet business goals and timelines

IT teams are constrained with escalating workloads

Turnkey IT Deployment

Healthcare-in-a-Box streamlines clinical openings and refreshes by providing preconfigured, ready-to-go IT equipment. This allows for rapid deployment and significantly reduces costs, ensuring a seamless and efficient process for your staff.

Delivery
Reduces carbon emissions and freight charges with a single, on-time delivery with available white glove services.

One Source Vendor
Centralize all products in one location to help facilitate efficient timing and delivery coordination.

Customization and Personalization
Custom kitting, reduced packaging, asset tagging, engraving, and more with add-on services deliver quick ROI wins.

Warehousing
Procure, stage, and inventory equipment from 1,600+ partners in the central U.S. to help reduce impact of supply chain constraints.

Advance Exchange and Depot Services
Depot repair, overnight device exchange, equipment refresh, and data disposal services extend device life efficiently and affordably.

Provisioning, Pre-configuration, and Testing
Receive equipment ready for employee use from day one with less DOA risk and faster workstream integration.

Turn to the Experts

We Offer a Full Stack of Integrated Solutions and Services

Provisioning and Imaging
| Image Development
| Configuration / Security Best Practices
| Build / Test / Support
| VPN / Corporate Enrollment and Sync
| Location-based Requirements
