

MODERN INFRASTRUCTURE AND MULTICLOUD

6 Ways to Overcome Cloud Complexity in Healthcare

Cloud Challenges Facing Healthcare IT Leaders

- Integrating many systems across the care continuum
- Migrating large volumes of sensitive patient data
- Interoperability challenges across cloud and on-premises systems
- Security and compliance in multicloud environments
- Managing legacy systems that cannot easily move to the cloud
- Operational burden on under resourced IT teams

6 Ways An Expert Partner Drives Competitive Solutions

1

Hybrid Cloud Built Around Real Healthcare Workflows

Design a hybrid architecture that optimizes cloud and on-premises systems while standardizing integration with Microsoft security and governance.

2

Secure, Compliant Data Migration, and Governance

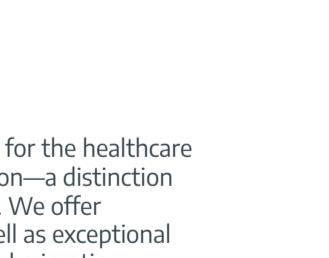

Apply a Zero Trust, HIPAA aligned migration approach using Microsoft security and compliance tools that are supported by an expert team that prioritizes patient safety.

3

Strengthening Interoperability Across Hybrid Environments

Design a hybrid infrastructure that optimizes workload placement and unifies identity and management with Microsoft 365, Teams, and Windows.

4

End to End Security and Continuous Risk Management

Embed cloud native guardrails, continuous monitoring, and automated compliance into every layer of infrastructure and application delivery—not just the perimeter.

5

Modernizing Legacy Systems Through Rationalization and Governance

Rationalize and modernize applications while keeping critical legacy systems on-premises and securely connected to cloud services through hybrid architectures.

6

Reducing Burden on Under-resourced IT Teams

Provide a healthcare-focused practice that aligns IT decisions to clinical, operational, and financial priorities while building resilient, secure operations with modern DR and redundancy.

Why Connection

With more than 40 years of experience providing IT services for the healthcare sector, Connection has attained Azure Expert MSP certification—a distinction achieved by fewer than 1% of Microsoft partners worldwide. We offer strategic partnerships with Azure ecosystem providers as well as exceptional value through the CSP+ program, which bundles advisory and migration services together with licensing.
