

HONEYWELL PC45

HEALTHCARE DESKTOP PRINTER

Application Brief

The healthcare industry has experienced recent unprecedented change that has made organizations evaluate how to further provide high-quality patient care. With labor forces thinning and budgets tightening, healthcare organizations are looking to squeeze every bit of productivity from their solutions, including their ability to accurately print laboratory sample labels, wristbands, medication labels and more.

The Honeywell PC45 healthcare desktop printer may be the ideal solution to help healthcare organizations meet and exceed their patients' expectations of care, while ensuring patient information stays secure. Built on the Honeywell Printer Edge™ platform, the PC45 is engineered to deliver the lifecycle, security, and durability you would reasonably expect from an enterprise-grade printing solution.

SITUATION

Patient expectations have shifted to expect more immediacy and a higher degree of security from their healthcare providers. That's why healthcare organizations can't afford delays in care due to inaccurate labels, security vulnerabilities, and connectivity issues. They need their printing operations and management to be as seamless as possible, so their clinicians can focus on what really matters: high-quality patient care.

That is why it is important for healthcare organizations to deploy a simply powerful printer solution that operates as a force multiplier for its clinicians. From the moment a patient enters the facility and is given a wristband, to the moment a sample is drawn, label printers are involved at every step. When medications are prescribed, accurate label printing is vital to display the medication dosage and directions, helping the patient with everything they need to know. Inaccurate printing can become a great hindrance to healthcare productivity, especially if printers aren't flexible enough to handle different print medias or withstand heavy demands.

Equally as important as the level of patient care is the ability for healthcare IT teams to be able keep patient data secure. With cybersecurity persistently remaining in the blind spot for many businesses, healthcare organizations need to make sure their printers are a source of strength rather than vulnerability. But that task can be made difficult if printer configuration

and troubleshooting needs to be carried out on site rather than being able to remotely carry out important IT tasks, including updates and security patches.

SOLUTION

The Honeywell PC45 healthcare desktop printer is an effective solution to help healthcare organizations accomplish simply powerful printing performance. Engineered with next-generation hardware and built on the Honeywell Printer Edge™ platform, the PC45 is designed to make measurable improvements to printing operations.

The PC45 is a compact, high-performance desktop printer that continues the legacy of proven E-class and PC43 series printers, with seamless connectivity, upgraded premium printing performance and reliability, and a new suite of supported accessories. The PC45

Honeywell

printer's 3.5-inch LCD touch screen offers a new user interface, improving user-friendly operations and better customer interaction. With tap-to-pair and scan-to-pair connectivity options, connecting the PC45 to your network or smart devices is seamless and quick.

The PC45 printer's compact design allows it to make the most of limited spaces without sacrificing print speed, accuracy or durability. Additionally, the disinfectant-ready housing allows the PC45 to withstand chemical cleaners used routinely to help keep workstations safer for patients and clinicians alike. It is a great solution for healthcare organizations in need of a compact label printer to optimize workflows, enhance label and wristband printing workflows, and keep patient data secured.

HONEYWELL PRINTER EDGE™

The PC45 desktop printer is built on the Honeywell Printer Edge™ platform, offering simplified network integration, improved security measures and consistent user experiences. With Honeywell Printer Edge™, PC45 users can remotely connect software apps and effortlessly integrate their printer fleet. Intuitive interfaces offer users the ability to remotely manage multiple printers without having to learn about each individual printer, and centralized printer management allows for remote troubleshooting and updating.

CONTINUED LEGACY

The PC45 continues the legacy of Honeywell's proven E-class and PC43 printers. While it comes with some new unique accessories, the PC45 supports most PC43 accessories such as a cutter tray, heavy-duty springs, media lock, serial cable, parallel cable, thermal printhead, cleaning card and much more.

SIMPLIFIED CONNECTIVITY

The PC45 offers simplified and seamless connectivity where Ethernet is standardized. Supporting Wi-Fi 6, BT5.1, and an optional serial port to cover common business case needs, the PC45 offers businesses the flexibility they need from their printing solution. With tap- and scan-to-pair options, the PC45 offers a smooth connection experience wherever it's needed.

MAXIMIZED PERFORMANCE

The PC45 offers better print performance and higher maximized speeds on wider width media, you have even more options for your printing operations. With low label and ribbon sensor notifications – you can make sure that media is replaced in a timely fashion before it interrupts downstream productivity. Its durable and compact design allows it to fit where you need it most and can withstand multiple operating environments.

LOOK TO THE FUTURE

Honeywell understands pressures placed on healthcare and how they can impact your operations. That's why we develop innovative technology that will help address today's challenges and set your organization up for future success. Our commitment is to work with you within your operation to help meet your specific needs and desires and to help you achieve your goals now and in the future.
