

Barracuda NextGen Firewall X

Cloud-Connected, Easy-to-Use Next-Generation Firewall

PC Connection® For the fastest response, contact the team: PCCConnection@Barracuda.com

Next-generation visibility and control for today's modern networks—the Barracuda NextGen Firewall X-Series provide **full application control, user awareness, and content security that's so easy to use, it's even manageable from the cloud.**

- Security
- Storage
- Application Delivery
- Productivity

The Barracuda Advantage

- Easy-to-use, web-based administration
- Affordable, all-inclusive pricing
- Unlimited users and protected IPs per firewall
- Unlimited remote connectivity VPN clients included
- Cloud-based centralized management
- Flexible web filtering options (on-box, cloud, Barracuda Web Filter integration)

Product Spotlight

- Granular control over thousands of applications
- Full user-awareness
- Stateful firewall and IPS network perimeter protection
- Optimized Internet connectivity via multiple providers
- True application-based provider selection
- Application control and content security inspection on encrypted web traffic

Next-Generation Firewall

The Barracuda NextGen Firewall X-Series uses application visibility and user-identity awareness to enable enforcement of granular access policies. Define policies based on any combination of application, user or group ID, time, and other criteria. Policies can even respond to specific application behaviors or features - for example, allowing all employees to use Skype voice, but allowing only executives to use Skype video, except after business hours.

Content Security

With the Barracuda NextGen Firewall X-Series, the content security functionality is not simply bolted on top of the network stack, it's deeply integrated into the firewall engine. As an option, antivirus and web filtering may even be offloaded to the Barracuda Web Security Service cloud, freeing further CPU cycles for network scalability.

Affordable and Easy to Use

The Barracuda NextGen Firewall X-Series is the first next-generation firewall to combine application control, user awareness, network firewall, and content security with the elasticity of the cloud. Unmatched ease of use means there's no need for additional IT staff or special training, and with the Barracuda NextGen Firewall X affordable, all-inclusive pricing, you can rest assured that there won't be any surprise costs down the road.

Typically, performance decreases as features are enabled. But the Barracuda NextGen Firewall X-Series has provided me with all of the features I need, while improving overall network performance.

Technical Specs

Firewall

- Stateful packet forwarding
- Full user-identity awareness
- Intrusion Prevention (IPS)
- Application Control and enforcement (incl. subtypes)
- SafeSearch Enforcement
- YouTube for Schools enforcement
- DoS/DDoS denial of service protection
- Transparent DNAT forward
- NAT, PAT
- Object-oriented rulesets
- Dynamic rules/timer triggers
- User/group-based firewall rules
- High Availability
- ARP security
- Bridging
- Jumbo frame support

User Identity Awareness

- Terminal Server Agent
- Domain Controller Agent
- Full user and group membership awareness
- Authentication via captive portal
- Authentication – supports NTLM, RADIUS, LDAP/LDAPS, Active Directory, local authentication
- Authentication browser for AD and LDAP servers

Infrastructure Services

- DHCP server
- HTTP proxy
- SIP proxy
- DNS cache
- Authoritative DNS
- SNMP support

Traffic Optimization

- Uplink monitoring and aggregation
- Policy routing
- Application-based provider selection
- Traffic shaping and QoS
- 7 predefined shaping bands
- Health checks for static links / routes via ICMP

VPN

- Unlimited Site-to-Site VPN licensing
- Unlimited Client-to-Site VPN licensing
- Unlimited SSL VPN
- VPNC certified (basic interoperability)
- Supports IPsec, PPTP
- Supports AES-128/256, 3DES, DES, null ciphers
- VPN clients available for Windows, Mac, Linux
- iOS and Android mobile device VPN support

Wi-Fi (on selected models)

- Wi-Fi (802.11n) access point
- Up to three independent wireless networks
- Click-through Wi-Fi portal web page for guest access

Support Options

Barracuda Energize Updates

- Firmware updates
- IPS signature updates
- Application control updates
- Standard technical support

Instant Replacement Service

- Replacement unit shipped next business day
- 24/7 technical support
- Hardware refresh every four years

Security Options

Barracuda Web Security

- Optional security subscription for 1, 3, or 5 years
- Category-based web filter (online or on-box)
- Virus protection (online or on-box)
