

Capture Client powered by SentinelOne

A unified client platform that delivers multiple endpoint protection capabilities, including advanced malware protection and support for visibility into encrypted traffic

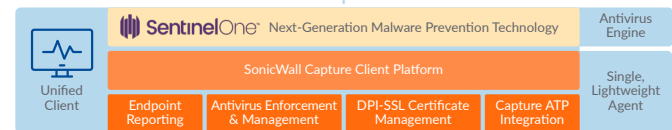

PROBLEMS

1. Keeping security products up to date
2. Enforcing policies and compliance
3. Getting reports
4. Threats coming through encrypted channels
5. Understanding alerts and remediation steps
6. License management
7. Stopping threats like ransomware

FEATURES

1. Firewall enforcement
2. DPI-SSL certificate management
3. Continuous behavioral monitoring
4. Multiple layered heuristic-based techniques
5. Unique rollback capabilities (Capture Client Advanced only)
6. Integration with Capture Advanced Threat Protection (Capture Client Advanced only)

QUESTIONS TO CONSIDER

1. Do your endpoints need consistent advanced protection against ransomware and encrypted threats?
2. How easily can you enforce policy compliance and license management across all endpoints?
3. Do you struggle with the visibility of endpoints and management of your security posture?
4. Do you inspect encrypted traffic coming into the network?
5. How many endpoints leave the network security perimeter on a given week?
6. How long has it been since you evaluated how you secure endpoints?

FAQS

1. **Question:** Isn't my traditional signature-based antivirus good enough?
Answer: No. SonicWall discovered 56 million new forms of malware in 2017. Capture Client stops malware not already identified in signatures.
2. **Question:** What if I don't have budget for a new solution?
Answer: Malware infections are costly. 61% of businesses have been infected by ransomware, but less than 50% of those business that paid ransom got all data restored.
3. **Question:** What if I don't want to replace my firewall vendor?
Answer: A firewall is not necessary for the protection of endpoint clients using the Capture Client products.
4. **Question:** What if I don't want to take up large chunks of memory for another large application file on our end points?
Answer: Capture Client file size is negligible (between 50-250 MB).
