MACRA and Promoting Interoperability Require Choosing the Ideal Devices for Your Clinicians

Get On the Right Path with Our Clinical Device Assessment Service

Meaningful Use has changed. Now known as Promoting Interoperability, there’s little time for hospitals and clinics to prepare for the new laws and regulations that came with the legislation. Now more than ever, the ability to capture and manage patient data from intelligent medical devices has become a necessity to advance patient safety, better clinical outcomes, and maintain compliance. Our Clinical Device Assessment Service can ensure that your caregivers have the most appropriate technology devices at the point of care.

How Our Clinical Device Assessment Service Works

Our Clinical Device Assessment Service is an ideal way to refresh and deploy the technology devices required—including tablets, smartphones, carts, handhelds, and barcode readers—to move your organization to a full mobile platform. Our 3-step process will guide you through an assessment of your current fleet, analyze your specific needs and workflows, and help you stage and execute a clinical device fair. Upon conclusion, you will have all of the information and tools necessary to select and support the right devices for your unique healthcare environment.

3 Steps to Moving Forward with Mobile Technology

1. During an initial call to schedule your assessment, we will guide you through a review of your existing clinical devices, applications, and workflows. In addition, a recommended clinical workflow analysis will evaluate which types of devices best suit your unique needs. This includes compatibility with current IT systems and a project budget.

2. A certified healthcare representative will assist you in the coordination of a turn-key, on-site clinical device fair complete with product demonstrations, and optional on-site vendor representation. Should you choose to expedite your project, we offer the capability to deploy solutions in the field and conduct live testing under real-world conditions. Both evaluation options include interactive survey tools customized to score end-user satisfaction with the devices.

3. After your clinicians have completed their evaluation of devices and the surveys are received, we will compile the data and analyze it. Then we will provide you with an automated detailed report showing which devices your caregivers selected and why.
Optimize Patient Care with the Right Healthcare Technology

As part of our Clinical Device Assessment Service, we will work with you to determine which devices meet the requirements of your organization. Our offerings include products and solutions through the following partnerships:

**Tablets/Laptops**

- Apple
- Dell
- EMC
- Fujitsu
- HP
- Lenovo
- Microsoft
- Motion
- Panasonic
- Samsung

**Handheld/Bar Code Scanners**

- Datalogic
- Honeywell
- Zebra

**Carts**

- Capsa
- Enovate Medical
- Ergotron
- Humanscale
- Jaco

**Smartphones**

- Apple
- Honeywell
- Samsung
- Zebra
